[quote="Willi Rass"]Jim,  
The blue LED's are now available.  
Have a look under: <http://www.df4nw.de/>

I have just today installed the blue replacement LED display, shipped very quickly from Germany. Thank you, Willi. My son is taking 2nd year German in High School and enjoyed seeing the mail from Germany.

The display is BEAUTIFUL! A very uniform and pleasing color, very COOL! The PC board is professional and high-quality, and the (English) installation instructions are well-written and very nicely illustrated. If the red and green displays are as good looking as the blue, and I am sure they are, then this is not a replacement display, it is an **UPGRADE!**

This is a product that every TR7 or R7 owner should give a serious look. Thanks again, Willi!

-Jim
